PLAN REVIEW

243 plans were reviewed. New construction and retrofitted buildings must conform to the following standards:

- National Building Code (NBC)
- National Fire Code of Canada (NFCC)
- National Fire Prevention Association Standards
- National Standards System covering Underwriters Laboratories of Canada, Canadian Standards Association, Canadian Gas Association and Canadian General Standards Board
- Northwest Territories (NWT) Fire Prevention Act

FIRE VEHICLES

In 1985, one (1) Triple Combination Pumper was delivered to Arctic Bay.

COMMUNITY VISITS

105 trips to communities were carried out in 1985. During these trips, the Fire Safety Officer held training sessions with the Fire Departments and the general public. These sessions are to train the volunteer members in fire fighting techniques as well as fire prevention. The local fire departments usually hold bi-monthly training sessions on various aspects of fire fighting.

When a community received a new fire vehicle, a member of the Fire Safety Section trains the fire fighters in the operation and maintenance of the unit.

Training is also conducted in the schools and at public meetings in an effort to make everyone more aware of fire hazards and fire prevention. This office held 56 training sessions in the communities. This does not include training conducted by local Fire Chiefs in their respective communities.

Inspections are carried out in the communities in private homes at the request of the owner and in public buildings as per the Fire Prevention Ordinance. The local Fire Chiefs also assist with inspections. This office conducted **449 inspections**.

INVESTIGATIONS

24 fire investigations were conducted during 1985. Five (5) deaths were attributed to three (3) of these fires throughout the Northwest Territories. Investigations were also conducted by this office and by the local Fire Chiefs of all fires particularly those of suspicious nature.
